---

Seeking a position as an mobile developer where I can work in a challenging environment and gain experience in working as part of a team to research and develop new software products and mobile application in which I have specialization.

### **PROFESSIONAL EXPERIENCE:**

#### **Microsoft Evangelist**

**Current**

##### **Microsoft**

Being Microsoft Evangelist I run workshops and hackathons all over the Ontario.

- \* Host a tech event and demo at Algonquin College
- \* Gave a workshop in Mobile Application Design and Development and Internet of Web application on Xamarin and Xamarin Forms.
- \* Hosted event with Marc Gagne Sr. Tech Evangelist at Microsoft on Microsoft Azure. Topic covered were: Microsoft Azure Search, Web App, Web Jobs, Application Insights and Microsoft Cognitive Services.
- \* Giving Live coding demo in front of the class.

Article printed on the [Algonquin College](#) and [Algonquin College Times](#).

#### **Algonquin College**

**Current**

Program Assistant/Teacher's Assistant and Peer Tutor

Helping Algonquin college students and Mobile Application Design and Development students with the programming questions helping them to understand the code and how to write code and debug the coding problem they encounter.

- \* Programming Languages like Android Java, C#, C++, HTML, JavaScript, CSS, PHP, Swift, Windows UWP and Networking issues.

#### **Algonquin College – Applied Research**

**October 2016 – January 2017**

Designer and Mobile Developer

**Client:** Nightlight

Developing iOS message extension using Swift 3.0, Keystone JS for the backend and designing the screens and layout.

- \* Using Swift 3.0 developed an iOS message extension which allows user to share location if there is an emergency.
- \* It sends an Bubble message to they want to share the location and coordinates of the user location is sent to the Backend so the security official can track the user location by giving Uber like Maps functionality.
- \* Developed the backend in keystone and created an RESTful API which application POST the data of the user name and location coordinate and alerts the security with Cron job which send text messages with twilio API.
- \* Designed the screens for Application using Adobe Photoshop and Adobe Illustrator and made a prototype in InVision followed by user scenarios and user personas.

**Algonquin College –Applied Research**

**May 2016 – September 2016**

Mobile Developer

**Client:** Contextere

Developing for Universal Windows Platform Phone Application, Microsoft Band and Microsoft HoloLens.

- \* Using C#, Xamarin and .NET made a Universal Windows Application.
- \* Using Microsoft Band SDK developing Band screens for the client.
- \* Integrating the UWP app to be used for Microsoft HoloLens.
- \* Used Microsoft Azure for Push Notification from Server to App.
- \* Helped designing the screens for the App with UI/UX design.

**Iron Data**

**Contract (2015)**

Web Developer

**Client:** California Department of Consumer Affairs

Developing the web page for the Department of consumer affairs (DCA) and configuration for the webpage to the database for the different license types.

- \* Creating a webpage with Java Script, HTML and CSS in Versa regulation software.
- \* Configuration of all the licenses to DCA portal.
- \* Linking RSD table and query by the client requirement.
- \* QA of all the documents.
- \* Managing the databases and adding new entry in database.
- \* Using Database to Add, Delete, and insert new value.
- \* Helping team in resolving their queries and doubts.

**Wipro**

**2013-2014**

Software Developer

**Client:** British Telecom.

Developing Graphical User Interface for British Telecom Customer services and connecting it through MySQL database which contains all the information of the users.

- \* Developed Customer Information Solution using visual studio (.NET framework, C++, C#, Windows Forms) and MySQL Server.
- \* Created Graphical User Interface using Visual Studio.
- \* Wrote SQL Script, Stored Procedure and triggers using T-SQL.
- \* Designed Charts, Algorithm, Report using Crystal Reports and MS Report Builder.
- \* Integrated to system with Address Validation and Mail Sorting Software.
- \* Connected different software with one Graphical User Interface to other GUI using scripting programming language which becomes easy for employee to deal fast with customer.
- \* Provided production support and handled user's inquiries.
- \* Assisted customer support in resolving client's issues.

## **SPOKEN TUTORIALS**

**2012-2014**

Programmer and Manager.

**Client:** IIT BOMBAY

Creating a website which is an E-learning Portal with more than 20 programming languages which can be learned by seeing the video and was created with help of HTML, Java, PHP, CSS, Movie Maker, ASP.NET and was connected with the Oracle Database.

- \* Developing Forums which is friendly E-Learning Portal (HTML, CSS and JAVA).
- \* Making a video for all the courses so that user can see, listen and study (PHP and Movie Maker).
- \* Linking all the user's information whenever one login in database (Oracle).
- \* Organised, co-ordinated and supervised this Courses in different universities.
- \* Excellent skills in communicating and presenting.

## **VOLUNTEER WORK:**

### **TORONTO INTERNATIONAL FILM FESTIVAL**

**2015**

Business Services Technician

As a Business Services Technician Volunteer, my duties includes:

- \* Troubleshooting technical issues, such as log in difficulties and Wi-Fi problems, for delegates in the Business Centre, Press & Industry Screening Library and throughout the Industry Centre.
